### FY 2010 SAPT Reports

The SSA contracts with SC Department of Health and Environmental Control, 10 county alcohol and drug abuse authorities, and three community-outreach agencies to provide early intervention services and other infectious diseases. Early intervention services provided include: pre/post-test counseling, HIV testing (rapid testing), risk assessment and HIV screening, referral services, and HIV/AIDS education.

### State Narrative Summary

In FY 2006, local health departments throughout the State tested more than 50,000 people for HIV; of these, 437 reported being injecting drug users, 76 reported being sex partners of these users, and 740 reported trading drugs or money for sex. Utilizing incidence and prevalence data for HIV and AIDS cases, the state offered targeted services concentrated in counties with the highest numbers. An example is one county, where an outreach worker provided 1,258 counseling and testing activities. The State also offered mobile van services which targeted very high risk areas; this van provided 2,879 HIV tests. Similar testing rates were reported for FY 2008; the outreach worker conducted 1,113 counseling and testing activities in collaboration with the local health department which tested 7,054 people. Through a long standing partnership with the State Department of Health and Environmental Control and associated grant funding, the State offered an array of training, workshops, and seminars statewide. In FY 2009, the State anticipated continuing these activities, as well as other activities related to early intervention and testing for Hepatitis C. Activities are monitored through a combination of progress meetings with the county alcohol and drug abuse authorities funded to provide HIV Early Intervention Services, desk audits, and site visits.

\*THE MOST RECENT DATA PUBLISHED PRIOR TO OCTOBER 1, 2008 BY THE CDC IS TABLE 14, REPORTED AIDS CASES AND ANNUAL RATES (PER 100,000 POPULATION), BY AREA OF RESIDENCE AND AGE CATEGORY, CUMULATIVE THROUGH 2005-UNITED STATES, HIV/AIDS SURVEILLANCE REPORT 2005 VOL. 17, U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES, CENTERS FOR DISEASE CONTROL AND PREVENTION, NATIONAL CENTER FOR HIV, STD, AND TB PREVENTION, DIVISION OF HIV/AIDS, PREVENTION, SURVEILLANCE, AND EPIDEMIOLOGY. ## Full State Narrative

### FY 2006 (COMPLIANCE)

---

Objective 1: DAODAS will contract with DHEC and the Ryan White HIV Care Consortia for the provision of early-intervention services for HIV. DAODAS will collaborate with the South Carolina Hepatitis C Coalition to increase educational awareness of Hepatitis C. Compliance: DAODAS contracted with DHEC for the provision of HIV early-intervention services and resources to clients in the alcohol and other drug abuse system. Through this relationship, HIV early-intervention services were provided for clients in the system who were identified as at high risk for or who were diagnosed with HIV infection. Services consisted of HIV counseling, testing, and other supportive services. In addition, DHEC and DAODAS incorporated a Hepatitis C education and screening initiative through collaboration with the South Carolina Hepatitis C Coalition. As a result, clients and substance abuse professionals had access to Hepatitis C prevention, education, and treatment resources.

During this period, 53,588 persons were tested for HIV through local health departments across the state. DHEC provided statistical documentation of its outreach related to this contract's deliverables. Of those tested, 437 reported that they were injecting drug users, 76 reported being sex partners of injecting drug users, and 740 reported exchanging money or drugs for sex. The contract provided for targeted outreach services. Concentrating in Richland County, the contracted outreach worker provided 1,258 counseling and testing activities. These activities were spread among various community locales, such as the county alcohol and drug abuse authority, community health fairs, crisis ministry organizations, and shelters. Because this service was linked to the local health department, 7,180 persons were tested. This outreach model was replicated in the Pee Dee / Waccamaw public health region, where 369 screening activities were conducted.

The contract also provided resources for mobile van services. These services targeted very "high-risk areas" where persons engaged in high-risk sexual behavior along with alcohol or other drug use. This service was an additional strategy for screening persons in the Edisto-Savannah District (436) and the Waccamaw District (281). In all, 2,879 HIV tests were provided at the testing sites, including the two listed previously combined with sites in the Upstate and Pee Dee areas.

Finally, the contract helped DHEC provide funding to the South Carolina Hepatitis C Coalition. The following deliverables were reported through the final year-end report. The coalition reported that it produced and distributed 370 copies of an introductory video, Hepatitis C in South Carolina. When requested, the coalition sent out 120 information packets to drug counseling interventions that contained two new DHEC HCV brochures ("Facts about Hepatitis C" and "Hepatitis C Testing"). The coalition partnered with another community-based organization, the South Carolina HIV/AIDS Council, to print 5,000 copies of a brochure, "The Facts about Hepatitis C in South Carolina." During the year, 206 substance abuse professionals and 221 public health and community organization staff were trained on Hepatitis C screening, counseling, and testing. Hepatitis C testing and counseling resulted in 1,620 screening episodes.

Objective 2: DAODAS will provide and collaborate with agencies to provide workshops/training/seminars on HIV and other infectious-disease topics. DAODAS will continue to provide support for the annual South Carolina HIV/STD Conference.

Compliance: Through existing grants with DHEC, county alcohol and drug abuse authorities, and community-based organizations, DAODAS provided training, workshops, or seminars in differing venues across the state. For instance, a Charleston Center staff person provided four trainings – "The Essentials of HIV for the AOD Professional," "HIV & Adolescents," "Improving HIV Risk-Assessment Skills," and "AOD 101" – to a diverse population of 214 individuals from across the state. Most of the county authorities provided annual HIV and other infectious disease in-service training for their clinical staff. When possible, the county authorities

partnered with their local health departments to cross-train staff. Finally, it was demonstrated above that the grant held by DHEC allowed for training to be provided on topics related to HIV and Hepatitis C.

Objective 3: DAODAS will continue to contract with 10 county alcohol and drug abuse authorities for HIV early-intervention services.

Compliance: DAODAS contracted with the following county alcohol and drug abuse authorities for HIV early-intervention services: Aiken Center for Alcohol and Other Drug Services; Anderson/Oconee Behavioral Health Services; Charleston Center; Circle Park Behavioral Health Services (Florence County); Dawn Center (Bamberg, Calhoun and Orangeburg counties); LRADAC, The Behavioral Health Center of the Midlands (Lexington and Richland counties); The Phoenix Center (Greenville County); Shoreline Behavioral Health Services (Horry County); Spartanburg Alcohol and Drug Abuse Commission; and Sumter County Commission on Alcohol and Drug Abuse.

Contracted activities with the number of individuals who were impacted are summarized in the table below:

<b>Community Awareness</b>	<b>Risk-Reduction Education</b>	<b>Screening</b>	<b>Testing</b>	<b>Training</b>	<b>Staff Training</b>
54,294	7,716	2,331	382	77	124

Objective 4: DAODAS will continue to fund community-based HIV/AIDS outreach programs that target youth, African-Americans, Hispanics, and other racial/ethnic minority communities for HIV early-intervention services.

Compliance: DAODAS awarded funds to two community outreach agencies for implementation of HIV early-intervention services. These awards supported or enhanced development of HIV early-intervention service projects and related community-outreach efforts such as:

- HIV Oraquick testing;
- HIV pre- and post-test counseling;
- condom distribution;
- targeting the faith community, women, and youth; and
- collaboration of HIV case-management, treatment, and referral services with the local Ryan White HIV Care Consortia.

The two community outreach agencies are Palmetto AIDS Life Support Services and the South Carolina HIV/AIDS Council. The table below summarizes the contracted activities provided and the number of persons impacted.

<b>Community Awareness</b>	<b>Risk-Reduction Education</b>	<b>Screening</b>	<b>Testing</b>	<b>Training</b>
6,000	1,500	139	239	166

Addendum on HIV Rapid Testing: DAODAS was able to take full advantage of the Rapid Testing Initiative implemented by SAMHSA. Through our existing relationship with DHEC, we were able to provide technical assistance and support for county alcohol and drug abuse authorities to begin the Oraquick HIV Rapid Test. We were able to maximize DHEC’s expertise in HIV testing and their existing quality assurance protocols to aid in the transition. Coupled with the support provided through Mayatech, consenting providers were able to make a smooth transition from Orasure to Oraquick. The DHEC grant allowed them to purchase rapid-test kits and controls for use in identifying high-risk populations such as injecting drug users, persons having sex with

injecting drug users, and persons who trade sex for money or drugs. This could be the basis for further expansion if funding were available for redirection.

#### **FY 2008** (PROGRESS)

---

Objective 1: Through contracts and sub-grants with providers, DAODAS will provide treatment for persons with substance abuse problems with an emphasis on making available within existing programs early-intervention services, to include Oraquick testing, for HIV in areas of the state that have the greatest need for such services.

Progress: DAODAS contracted with DHEC and the Ryan White HIV Care Consortia for the provision of HIV early-intervention services and resources to clients in the alcohol and other drug abuse system. Through this relationship, HIV early-intervention services were provided for clients in the system who were identified as at high risk for or who were diagnosed with HIV infection. These functions consisted of HIV counseling, testing, and other supportive services. In addition, DHEC and DAODAS incorporated a Hepatitis C education and screening initiative through collaboration with the South Carolina Hepatitis C Coalition. As a result, clients and substance abuse professionals had access to Hepatitis C prevention, education, and treatment resources.

During this period, 49,211 persons were tested for HIV through local health departments across the state. DHEC provides statistical documentation of its outreach related to this contract's deliverables. Of those tested, 176 reported that they were injecting drug users, 19 reported being sex partners of injecting drug users, and 72 reported exchanging money or drugs for sex. The contract provided for targeted outreach services. Focused in Richland County, the contracted outreach worker provided 1,113 counseling and testing activities. These activities were spread among various community locales, such as the county alcohol and drug abuse authority, community health fairs, crisis ministry organizations, and shelters. Because this service is linked to the local health department, 7,045 persons were tested.

The contract also provided resources for mobile van services. These services targeted very "high-risk areas" where persons engaged in high-risk sexual behavior along with alcohol or other drug use. In all, 1,167 HIV tests were provided at the testing sites, including the two listed previously combined with sites in the Upstate and Pee Dee areas.

Also, the contract helped DHEC provide funding to the South Carolina Hepatitis C Coalition. The following deliverables were reported through the final year-end report. When requested, the coalition sent out 100 information packets to drug-counseling interventions that contained two new DHEC HCV brochures ("Facts about Hepatitis C" and "Hepatitis C Testing"). A key service provided by the Coalition is to assist clients in sorting out the information and making informed decisions on how best to proceed as the result of testing positive for HCV. Thus, more than 100 persons were provided individual counseling services by the Coalition. The Coalition has tapped into its creative side to develop a highly recognized promotional item, the "Giant Microbe" – a plush toy representation of the actual Hepatitis C virus that is equipped with a readable tag displaying the basic risk-factor message. Approximately 350 "Giant Microbes" were distributed in this time period. During the year, 80 substance abuse professionals and 60 public health and community organization staff were trained on Hepatitis C screening, counseling, and testing. Finally, Hepatitis C testing and counseling resulted in 1,376 screening episodes.

Through existing grants with DHEC, county alcohol and drug abuse authorities, and community based organizations; DAODAS is able to provide training, workshops, or seminars in differing venues across the state. Most of the county authorities provide annual HIV and other infectious disease in-service training for their clinical staff. When possible, the county authorities partner with their local health departments to cross-train staff. Finally, it has been demonstrated above that the grant held by DHEC allows for training to be provided on topics related to HIV and Hepatitis C.

DAODAS continued to contract with 10 county alcohol and drug abuse authorities for HIV early-intervention services. The following county authorities were recipients of HIV early intervention services funding: Aiken Center for Alcohol and Other Drug Services; Anderson/Oconee Behavioral Health Services; Charleston Center; Circle Park Behavioral Health Services (Florence County); Dawn Center (Bamberg, Calhoun, and Orangeburg counties); LRADAC, The Behavioral Health Center of the Midlands (Lexington and Richland counties); The Phoenix Center (Greenville County); Shoreline Behavioral Health Services (Horry County); Spartanburg Alcohol and Drug Abuse Commission; and the Sumter County Commission on Alcohol and Drug Abuse. Contracted activities with the number of individuals who were impacted are summarized in the table below:

<b>Community Awareness</b>	<b>Risk-Reduction Education</b>	<b>Screening</b>	<b>Testing</b>	<b>Training</b>	<b>Staff Training</b>
6,878	3,933	3,022	809	NA	131

DAODAS awarded funds to three community outreach agencies for implementation of HIV early-intervention services. The focus of these awards was to support or enhance development of HIV early-intervention service projects and related community-outreach efforts such as:

- HIV Oraquick testing;
- HIV pre- and post-test counseling;
- condom distribution;
- targeting the faith community, women, youth, and the homeless; and
- collaboration of HIV case-management, treatment, and referral services with the local Ryan White HIV Care Consortia.

The three outreach agencies are Palmetto AIDS Life Support Services, the South Carolina HIV/AIDS Council, and the Little River Medical Clinic. The table below summarizes the contracted activities provided and the number of persons impacted.

<b>Risk-Reduction Education</b>	<b>Screening</b>	<b>Testing</b>
1,216	1,225	829

Addendum on HIV Rapid Testing:

Through our existing relationship with DHEC, we have been able to provide technical assistance and support for county alcohol and drug abuse authorities to begin and sustain the Oraquick HIV Rapid Test. We were able to maximize DHEC’s expertise in HIV testing and its existing quality assurance protocols to aid in the transition. Currently, the DHEC grant allows for the purchase of rapid-test kits and controls for use in identifying high-risk populations such as injecting drug users, persons having sex with injecting drug users, and persons who trade sex for money or drugs. Thus, this could be the basis for further expansion if funding were available for redirection. However, we will continue to expand our ability to provide rapid testing to our service population by fostering collaborations and the sharing of existing resources.

Objective 2: DAODAS will effectively monitor such service delivery.

Progress: A process is in place to effectively monitor the delivery of HIV early-intervention services. First, the funded HIV early-intervention service coordinators working in the 10 county alcohol and drug abuse authorities meet on a quarterly basis. During this meeting, progress related to local service delivery is shared. When warranted, professional development training is provided. Problems experienced at the local level are

shared so that potential solutions can be identified by the entire group. Finally, federal Block Grant requirements mirrored in the DAODAS Governing Terms are discussed for clarity and compliance.

Second, desk audits are performed on mid-year and year-end reports, as well as regularly submitted data that follow a designated format provided by DAODAS. The format asks for strengths and weakness identified during service implementation; existing resources that aided in service delivery; barriers to service delivery; and corrective action taken to ensure the efficiency and effectiveness associated with the service delivery. Finally, each report details progress on process and/or outcome objectives – who, what, when, where, how much – that outlines what activities, behavioral change, and increase in knowledge on risk behaviors were associated with the local HIV early-intervention services.

Third, regularly scheduled site visits are conducted. A standardized protocol for the visits has been developed. The protocol is compliant with federal Block Grant requirements that are reflected in the Governing Terms of the DAODAS Block Grant. During the visits, existing memoranda of understanding and agreement are reviewed. Activities associated with in-service training for local partner organizations and agency staff are discussed. Finally, progress on service implementation and the agency's continuous quality improvement practices are examined.

#### **FY 2009** (INTENDED USE)

---

Objective 1: Through contracts and sub-grants with providers, DAODAS will provide treatment for persons with substance abuse problems with an emphasis on making available within existing programs early-intervention services for HIV in areas of the state that have the greatest need for such services.

DAODAS will continue to contract with DHEC and the Ryan White HIV Care Consortia for the provision of HIV early-intervention services and resources to clients in the alcohol and other drug abuse system. Through this relationship, HIV early-intervention services are provided for clients in the system who were identified as at high risk for or who were diagnosed with HIV infection. These functions consist of HIV counseling, testing, and other supportive services. In addition, DHEC and DAODAS incorporate a Hepatitis C education and screening initiative through collaboration with the South Carolina Hepatitis C Coalition. As a result, clients and substance abuse professionals have access to Hepatitis C prevention, education, and treatment resources.

During this period, approximately 49,000 persons are expected to be tested for HIV through local health departments across the state. DHEC provides statistical documentation of its outreach related to this contract's deliverables.

The contract provides for targeted outreach services. Focused in Richland County, the contracted outreach worker provides approximately 1,000 counseling and testing activities. These activities are spread among various community locales, such as the county alcohol and drug abuse authority, community health fairs, crisis ministry organizations, and shelters. The contract also provides resources for mobile van services. These services target very "highrisk areas" where persons engaged in high-risk sexual behavior along with alcohol or other drug use. In all, approximately 1,100 HIV tests are expected to be provided at the testing sites, including the two listed previously combined with sites in the Upstate and Pee Dee areas. Also, the contract helps DHEC provide funding to the South Carolina Hepatitis C Coalition. We expect that the following services will continue to be provided:

- Information packets provided to drug-counseling interventions that contain two new DHEC HCV brochures ("Facts about Hepatitis C" and "Hepatitis C Testing").
- Assisting clients in sorting out the information and making informed decisions on how best to proceed as the result of testing positive for HCV.

- Disseminating promotional items, such as the “Giant Microbe” – a plush toy representation of the actual Hepatitis C virus that is equipped with a readable tag displaying the basic risk-factor message.
- Training substance abuse professionals and public health and community organization staff on Hepatitis C screening, counseling, and testing.

Through existing grants with DHEC, county alcohol and drug abuse authorities, and community based organizations; DAODAS is able to provide training, workshops, or seminars in differing venues across the state. Most of the county authorities are expected to provide annual HIV and other infectious disease in-service training for their clinical staff. When possible, the county authorities partner with their local health departments to cross-train staff.

DAODAS plans to contract with 10 county alcohol and drug abuse authorities for HIV early intervention services. The following county authorities are the recipients of HIV early intervention services funding: Aiken Center for Alcohol and Other Drug Services; Anderson/Oconee Behavioral Health Services; Charleston Center; Circle Park Behavioral Health Services (Florence County); Dawn Center (Bamberg, Calhoun, and Orangeburg counties); LRADAC, The Behavioral Health Center of the Midlands (Lexington and Richland counties); The Phoenix Center (Greenville County); Shoreline Behavioral Health Services (Horry County); Spartanburg Alcohol and Drug Abuse Commission; and the Sumter County Commission on Alcohol and Drug Abuse. Contracted activities with the estimated number of individuals who will be impacted are summarized in the table below:

<b>Community Awareness</b>	<b>Risk-Reduction Education</b>	<b>Screening</b>	<b>Testing</b>	<b>Training</b>	<b>Staff Training</b>
6,500	3,750	3,000	800	NA	125

Objective 2: DAODAS will effectively monitor such service delivery through the following means:

- The HIV early-intervention service coordinators working in the 10 county alcohol and drug abuse authorities meet on a quarterly basis. During this meeting, progress related to local service delivery is shared. When warranted, professional development training is provided. Problems experienced at the local level are shared so that potential solutions can be identified by the entire group. Finally, federal Block Grant requirements mirrored in the DAODAS Governing Terms are discussed for clarity and compliance.
- Desk audits are performed on mid-year and year-end reports, as well as regularly submitted data that follow a designated format provided by DAODAS. The format asks for strengths and weakness identified during service implementation; existing resources that aided in service delivery; barriers to service delivery; and corrective action taken to ensure the efficiency and effectiveness associated with the service delivery. Finally, each report details progress on process and/or outcome objectives – who, what, when, where, how much – that outlines what activities, behavioral change, and increase in knowledge on risk behaviors were associated with the local HIV early-intervention services.
- Regularly scheduled site visits are conducted. A standardized protocol for the visits has been developed. The protocol is compliant with federal Block Grant requirements that are reflected in the Governing Terms of the DAODAS Block Grant. During the visits, existing memoranda of understanding and agreement are reviewed. Activities associated with in-service training for local partner organizations and agency staff are discussed. Finally, progress on service implementation and the agency’s continuous quality improvement practices are examined.

### **HIV Early Intervention Services**

DAODAS continued to contract with DHEC for implementation of HIV early-intervention services.

In addition, DAODAS renewed funding for 10 county authorities to implement HIV early intervention projects. The 10 sites were: Aiken Center for Alcohol and Other Drug Services; Anderson/Oconee Behavioral Health Services; Charleston Center; Circle Park Behavioral Health Services (Florence County); Dawn Center (Bamberg, Calhoun and Orangeburg counties); LRADAC, The Behavioral Health Center of the Midlands (Lexington and Richland counties); The Phoenix Center (Greenville County); Shoreline Behavioral Health Services (Horry County); Spartanburg Alcohol and Drug Abuse Commission; and the Sumter County Commission on Alcohol and Drug Abuse. These local projects conducted outreach/education and renewed or maintained linkages with their local health departments, as well as many community organizations, to enhance HIV services to citizens statewide.

During FY 2006, five of these county authorities began to provide on-site Oraquick testing: Anderson/Oconee Behavioral Health Services; Charleston Center; Dawn Center; The Phoenix Center; and the Spartanburg Alcohol and Drug Abuse Commission. The Sumter County Commission on Alcohol and Drug Abuse has been trained in delivering the test, but they are still in the process of implementing it. However, HIV rapid testing continues to be an emphasis among the county providers, with an additional two providers making the test available for an increase of 49.6 % in rapid testing from FY 2006 to FY 2007. Through the various outreach efforts, specifically community awareness and risk-reduction education activities provided by project coordinators, an average of 51,202 citizens per year were impacted by their efforts. This figure was derived from averaging submitted data by project coordinators in year-end final reports for FY 2006 and FY 2007 and FY 2008.

Through DHEC and the county authorities, the following number of individuals received HIV testing and counseling services:

Provider	FY 2006		FY 2007		FY 2008	
	Tested	Infected	Tested	Infected	Tested	Infected
Local Health Departments	53,827	569 (1.1%)	50,198	548 (1.1%)	49,211	465 (0.9%)
County Alcohol and Drug Abuse Authorities	739	NA	1,106	NA	809	NA
<b>Total</b>	<b>54,566</b>	<b>569</b>	<b>51,304</b>	<b>548</b>	<b>50,020</b>	<b>465</b>

Mobile Screening Services: In addition to services provided at the local health departments, DHEC provided mobile screening services during the reporting period. In FY 2006, 2,879 individuals received HIV testing, which included the Edisto-Savannah District and the Waccamaw Health District. In FY 2007, 2,493 individuals received testing, which continued to include the Edisto- Savannah Districts and the Waccamaw Health District. In FY 2008, mobile screening was still provided that resulted in 1,167 individuals being tested. Most sites were located in very high-risk areas, reaching people who were also engaging in alcohol or other drug use. Referrals were made, as appropriate, to county alcohol and drug abuse authorities. The association of drug use and syphilis was prominent in the target areas – including exchanging sex for money and drugs and crack/cocaine use.

Training: Staff of DHEC’s STD/HIV Division participated in the planning and delivery of such substance abuse/HIV and STD cross-training sessions as:

- Annual South Carolina HIV/STD Conference;
- Ties That Bind Community HIV/AIDS Prevention and Testing Initiative;

- Oraquick Rapid HIV Testing Training;
- Counseling, Testing, and Referral Training;
- HIV and South Carolina Law;
- Confidentiality Training; and
- HIV and AOD Training.
