### State Narrative Summary

The California Department of Alcohol and Drug Programs (ADP) distributed all of its FY 2007 HIV early intervention services funding statewide to 52 of 58 counties; the remaining counties have minimal need for such funds and declined to receive them. The funded counties, in turn, contract with provider agencies to provide services that include rapid testing, regular HIV testing, pre/post test counseling, and outreach. In FY 2009, AD continued to work with the Department of Public Health Office on AIDS (OA) to facilitate better interactions between county-level substance abuse offices and OA officials. In FY 2010, the State intended to provide technical assistance to county agencies and providers as they implement HIV procedures. In addition, ADP plans to shift funds from under-expending counties to those with a history of full-expenditure in order to fully expend FY 2009 funds.

## Full State Narrative

### FY 2006 (COMPLIANCE)

---

The Department of Alcohol and Drug Programs (ADP) includes Substance Abuse Prevention and Treatment (SAPT) Block Grant requirements for human immunodeficiency virus (HIV) services in the Negotiated Net Amount Contracts with the counties.

ADP distributes 100 percent of the HIV Early Intervention Services (EIS) funding statewide to 52 of 58 counties. Six of its least populous counties (Alpine, Calaveras, Colusa, Mariposa, Modoc, and Trinity) have minimal need and have declined the funds. California requires counties that elect not to receive HIV funds to indicate, in writing, how the need for HIV services will be met using funds, other than SAPT discretionary funding.

Recipient counties contract to provide HIV EIS locally. California distributes at least \$7,500 to each of the 52 participating counties so the least populous have sufficient funds to provide an HIV EIS program. Beginning with the FFY 2007 funds, ADP revised the formula for distributing HIV set-aside funds and began using the California Department of Public Health, Office of AIDS (DPH-OA) needs-based methodology to allocate HIV set-aside funds. HIV funds are allocated on the following indicators and weighted amounts:

1. 70%: HIV Counseling and Testing (first time positives 2002-2004) + Living AIDS Cases through 12/31/2005
2. 15%: Sexually Transmitted Diseases (Syphilis, GC and Chlamydia in Men) in 2005
3. 8%: People Living Below Federal Poverty Line (2000 Census)
4. 7%: People of Color in General Population (2000 Census)

The HIV Counseling and Testing data refers to the cumulative sum of positive HIV tests (with no indication of a previously positive result) in the three most recent years of complete data (2002, 2003, and 2004) that were reported to the State. Because the funding is based on need, the amount each county receives may change annually.

ADP allocates HIV set-aside funds to counties including at least one county with a program in an urban area and one in a rural area.

ADP reviews allocations and county cost reports to determine compliance with the five percent minimum and maximum set-aside amount for HIV services and to ensure that at least one program is in a rural area. ADP monitors county systems, including provider subcontracts, through on-site visits to ensure compliance with federal HIV requirements and takes appropriate action if instances of noncompliance are identified.

ADP collaborates with DPH-OA to promote HIV/AIDS prevention and treatment services and to maintain access to pre- and post-test HIV counselor training by alcohol and other drug service providers and county alcohol and drug program staff. DPH-OA is responsible for monitoring HIV counseling and testing for compliance with state and federal statutes, regulations, and policies.

FFY 2006 (Compliance):

ADP performed the procedures described above; however, California did not spend \$328,019 of its 2006 HIV set-aside. Because of a late settlement with a county, only \$211,303 remained in Payment Management System for the '06 award. ADP submitted a check from non-federal funds for \$116,716, made out to The Department of Health and Human Services, to make up the difference in the minimum/maximum HIV expenditure requirement. The check, warrant number 04-032848, was sent October 17, 2008, to the Division of Payment Management, P.O. Box 6021, Rockville, MD 20852.

Although ADP does not have final settled cost report data for FFY 2007, it anticipates an under expenditure of HIV set-aside funds in FFY 2007 roughly approximate to the FFY 2006 under expenditure.

California was excluded from participating in the rapid testing training being offered through SAMHSA for a variety of reasons, one being that California laws and regulations preclude the use of Centers for Disease Control and Prevention-based curriculum for training HIV Testing Counselors. The training does not meet the more rigorous training required by California. However, DPH-OA was able to utilize the rapid HIV test kits received through SAMHSA's May 2005 initiative.

---

**FY 2008** (PROGRESS)

ADP performed the compliance procedures described in the Background and Ongoing Activities, above.

DHP-OA is in the process of implementing rapid HIV testing in counties throughout the state. There are a number of reasons that some jurisdictions and providers have not moved to HIV rapid testing. The primary benefit of rapid testing is reducing the number of clients not returning for test results. In places such as methadone treatment programs, where clients return on a daily basis, rapid testing, which is more expensive, is not necessary.

ADP will shift HIV EIS funds from under expending counties for FFY 2008 by mid-December 2008 to counties with histories of full expenditure and the capacity to provide additional HIV EIS services. As a result, ADP anticipates fully expending the HIV EIS funds for FFY 2008.

ADP will be meeting with DPH-OA to facilitate better interactions between county-level substance abuse offices and county-level OA officials. As a result of closer interactions with the DPH-OA, ADP anticipates better outreach efforts to county substance abuse offices that have had HIV EIS under expenditure difficulties.

---

**FY 2009** (INTENDED USE)

ADP will perform the compliance procedures for HIV described in the Background and Ongoing Activities, above. ADP will finalize the update of the SAPT Block Grant County and Provider Block Grant Authorization Guidelines and will provide technical assistance to county agencies and providers as they implement HIV procedures.

ADP will shift HIV EIS funds from under expending counties for FFY 2009 early in calendar year 2009 to counties with histories of full expenditure and the capacity to provide additional HIV EIS services. As a result, ADP anticipates fully expending the HIV EIS funds for FFY 2009.

---

**HIV Early Intervention Services**

The Department of Alcohol and Drug Programs (ADP) allocates HIV set-aside funding to California counties. County AOD administrators are responsible for ensuring that SAPT Block Grant funds, including the HIV set-aside, are expended in compliance with federal and state requirements. ADP annually monitors the counties for compliance with SAPT block grant requirements and takes appropriate action if instances of non-compliance are identified.

The description of the State's procedures and activities for HIV early intervention services can be found in the narrative response to Goal #6.

The total funds expended for HIV early intervention services for FFY 2006: \$13,032,018.

Attached is a list of the counties and providers that received HIV set-aside funding in FY 2006-07. Through the NNA contract, ADP requires the counties to comply with the requirements of the block grant and compliance is

monitored by ADP's Performance Management Branch. ADP does not require the counties to report information on the linkages between IVDU outreach and projects delivering HIV-EIS services.
